

Dear Mayco Company,

We are students in 5th grade class at Phoenix Country Day School in Paradise Valley, Arizona. We love working with your glaze colors. We have enclosed a gift in appreciation of your time, and we love sharing our passion for art. We just finished making pinch pot creatures with your glazes. They were fun to make and glaze.

We are writing to raise awareness about your color, SC-20 - *Birthday Suit*. Our class, 5-3 noticed that the name of the color does not seem to be inclusive of all skin tones. It represents a lighter skinned person, who we assume is white. We have been studying skin color for a recent painting project where we learned that there are well over **4,000** shades of skin tone. We would love if you were able to create a multicultural skin color pack with at least 10 shades of human skin tone. We would also love to see a name change of the color, *Birthday Suit*, because there are so many different shades of birthday suits, and your color seems to assume whiteness. We'd love to be testers for your new skin pack if that is helpful. Our class appreciates you considering this letter and we hope to hear back from you. Thanks again and have a wonderful day.

Sincerely,

5th grade students at PCDS - Section 5-3
